

Improved durability in the chassis paint.

Improved durability in the chassis paint.

We are constantly working to improve the quality of our products. We will therefore apply a layer of clear coat to our frames to improve the strength. For you as a customer, this will not affect the price, you will get a better product for the same cost.

For logistical reasons, we will implement this in two steps.

From 1 April-21, all wheelchair models from the extended range and standard wheelchairs in other colors than standard colors will be delivered with a clear coat. The colors Gray metallic and Racing blue already have clear coat and are not affected by the change.

In the next step, we will also introduce clear coat on the standard wheelchairs in their standard colors. We expect that production of these will start in about 6 months from now.

We have chosen two different types of clear coat depending on the base color, one with a matt finish and one with a glossy finish as below. On some of the colors, this means a slight nuance difference from how they looked before, color samples will be available if desired.

Color	Clear coat
Color Blue Classic	Glossy clear coat
Color Mean Green	Matt clear coat
Color Panorange	Matt clear coat
Color Brave Bronze	Matt clear coat
Color Gray metallic	Glossy clear coat
Color Anodic Black	Matt clear coat
Color White Pearl	Matt clear coat
Color Racing Blue	Glossy clear coat
Color Telemagenta	Matt clear coat
