Anti-tip for U2 light

Now we can offer anti-tip for U2 light.

Panthera U2 light is a wheelchair for the very experienced user who can handle a chair with a very "tippy" balance and are aware of the risk of falling backwards when the chair is lacking anti-tip.

U2 light have no anti-tip as standard. This is to increase the runnability and accessibility and to keep the weight as low as possible of the wheelchair..

There are users who like their U2 light very much and doesn't want to switch chair, but feel they need the extra security that the anti-tip offers.

Many customers have expressed their desire to get anti-tip for their U2 light and now we can offer it.

NOTE! Only possible to mount when ordering a new chair.
