

NEW DESIGN OF SIDEGUARD CARBON

The sideguard Carbon will soon be delivered with a new design, where the coating has a similar character as the Panthera X chassis, that is glossy with a distinct carbon fibre texture. The edges around the sideguard have acquired a smoother, rounder shape.

Carbon Large has also been given a slightly smaller cover over the rearwheel to increase the functionality when driving the wheelchair.

The sideguard attachment, for the backrest and the chassis, has been adjusted to give a firm fixation of the sideguard to the wheelchair.

Deliveries of sideguard Carbon with the new design will start gradually from this week.

Articlenumber and price will remain the same.

Sideguard Carbon Small with the new design.

Sideguard Carbon Small mounted.

Attachment for sideguard Carbon.
