RUBBER TREAD S3 CASTOR

RUBBER TREAD WHEEL ANTI-TIP DEVICE

### UPDATED MATERIAL IN THE RUBBER TREAD FOR S3 CASTOR WHEEL

After extensive testing, we have now updated the material in the rubber tread on our castors.

We have succeeded in developing a material that is substantially more durable, without losing the fine rolling properties they have always had.

Visually, the difference is seen when the previous tread has been slightly gray and matt to the surface, while the new one is slightly blacker and also glossy in the surface. [See image.](#)

The castors with the new improved rubber tread will be continuously introduced starting from 1 March 2019.

Article number and price remain unchanged.
