MOUNTING IN NEW CASTOR FORK

Castor fork S3 notification

As previously announced we have delivered the new castor wheel bushings for a while, to facilitate logistics and mounting ([Info sheet 2019-10](#)). Then we also announced that we will later on introduce an updated castor fork for much easier mounting. We have now started to deliver this castor fork.

The older version of the S3 castor fork will be delivered until its out of stock and the change will come off gradually. The old castor fork and the new bushings are forward and backward compatible with each other and therefore we do not change part number for the castor forks.
